

HAMDI HASSAN

AI Product Builder

Minnesota (Remote) • hamdi2008@gmail.com
Portfolio | GitHub | Twitter/X

PROFILE

AI Product Builder focused on designing, building, and shipping useful web products with Claude, Claude Code, ChatGPT, OpenAI Codex, Next.js, TypeScript, Supabase, and Vercel. I build quickly, iterate from real-world usage, and enjoy taking products from idea to production.

SELECTED PRODUCTS

Hamdi OS (Private Beta) Personal operating system for planning, measurements, reviews, and long-term progress. Built from idea to private beta.	MNMuslim Community platform connecting Minnesota Muslims with trusted services and events.
MNHalal Minnesota halal restaurant directory that continues to grow with verified listings.	By Hamdi Personal studio website showcasing products and AI strategy services.
